

Truewood Venetian Blinds

Kiwiblinds Truewood product raises the bar on venetian blind lightness, longevity and complete value. A highly functional and decorative window treatment, that is fully adjustable to provide you with your desired light ambience.

This product is very light - twice the width for the same weight as Fauxwood (PVC) blinds. Our Truewood range optimises closure and light stopping efficiencies with a stylish H-shaped bottom rail.

Sound hardwood from environmentally – friendly sources

Kiwiblinds Truewood hardware comes from sustainable plantations, unlike other timbers that are getting scarcer in quantity and quality. It's also more stable and doesn't warp as much as other woods. An extra heavy UV protective coating is applied to look great for much longer.

Unique flat fascia design

Fitting in with contemporary home decor, this design completely covers the high profile head rail, giving a better finished appearance.

Set light and temperature for optimum comfort

By tilting of the slats, you can create the exact light ambience you want. In winter, the great insulation properties of Truewood, means heat is conserved when slats are closed. In summer, they can be opened to let the cool breeze through. Setting these blinds to full-tilt, blocks the light and creates total privacy at night.

Features and Benefits

- 50mm width x 3mm thickness slat
- 75mm x 5mm valance (fascia) allowing complete coverage of head rail for a nice complete appearance
- Head Rail: Standard high profile 57mm x 51mm
